## SUMMARY

---

As a software engineer specializing in web development, I have a solid foundation in designing, developing, and maintaining quality websites. With my expertise in various programming languages, frameworks, and technologies, I consistently deliver quality solutions while following industry best practices.

## TECHNICAL SKILLS

---

**Languages:** PHP, HTML, CSS, JavaScript, Java, SQL

**Libraries:** Bootstrap, Tailwind

**Design Skills:** UI/UX Design

**Developer Tools:** Git, Figma

## EXPERIENCE

---

### Associate Software Engineer

Mar. 2024 – Present

*Exon Software Solution*

*Colombo, Sri Lanka*

- Since March 2024, I have worked as an Associate Software Engineer at Exon Software Solutions, where my duties have included creating and managing software applications with an emphasis on performance and scalability.
- I have optimized code and increased system efficiency while collaborating with senior engineers on both front-end and back-end development. I have been able to improve my critical thinking skills, work with a variety of technologies, and produce excellent solutions on time thanks to this role.

### Intern UI/UX Engineer

Jul. 2023 - Mar. 2024

*Exon Software Solution*

*Colombo, Sri Lanka*

- From July 2023 to 2024, I had the chance to work at Exon Software Solutions as a UI/UX Engineer Intern. I worked on several projects during this time, concentrating on developing user interfaces that were contemporary and easy to use.
- I implemented design solutions that improved accessibility and user experience while collaborating closely with cross-functional teams. Working in a fast-paced, collaborative setting, this experience helped me hone my abilities in front-end development, prototyping, and UI/UX design.

## PROJECTS

---

### Creative 360 One | *PHP, SQL, HTML5, Bootstrap, GitHub Action*

Oct 2024 – Present

- Created a responsive website for Creative 360 One that offers a user experience optimized to the goals and branding of the business.
- PHP and SQL were used to implement backend functionality for a smooth user interface and effective data management.
- For a contemporary, user-friendly design, HTML5 and Bootstrap were used, and GitHub Actions was used to set up continuous deployment to expedite updates.

### Furniture Management System | *PHP, SQL, HTML5, Bootstrap, GitHub Action*

Jan 2024

- This project is for a real client, so I used the technologies PHP, HTML5, CSS, bootstrap, JavaScript, and SQL to build this project.

### Train Foody – Mobile Food Delivery App UI | *Figma, AI Tools*

May 2024

- Created a food delivery service's mobile app interface with an emphasis on a simple, easy-to-use interface to increase client satisfaction.
- To speed up the prototyping process and guarantee unified UI elements and smooth navigation, Figma and state-of-the-art AI design tools were used.
- Collaborated with stakeholders to incorporate user feedback, adjusting the design in accordance with the outcomes of usability testing and user requirements.

## EDUCATION

---

**Undergraduate BSc (Hons) Software Engineering** 2021 – Present  
*Undergraduate BSc (Hons) Software Engineering at Birmingham City University (Java Institute for Advanced Technology.)*

**(2021-2023) followed diploma in software engineering** 2021 – 2023  
*(2021-2023) followed diploma in software engineering- at Java Institute for advanced technology.*

## REFEREES - UPON REQUEST

---

**Prof. Rasika Aponsu**

Director  
ICBM Campus  
14/ 15, R. A. De Mel Mw., Colombo 00400,  
Sri Lanka
